

Virtual University

Working through the Work of Making Work Mobile

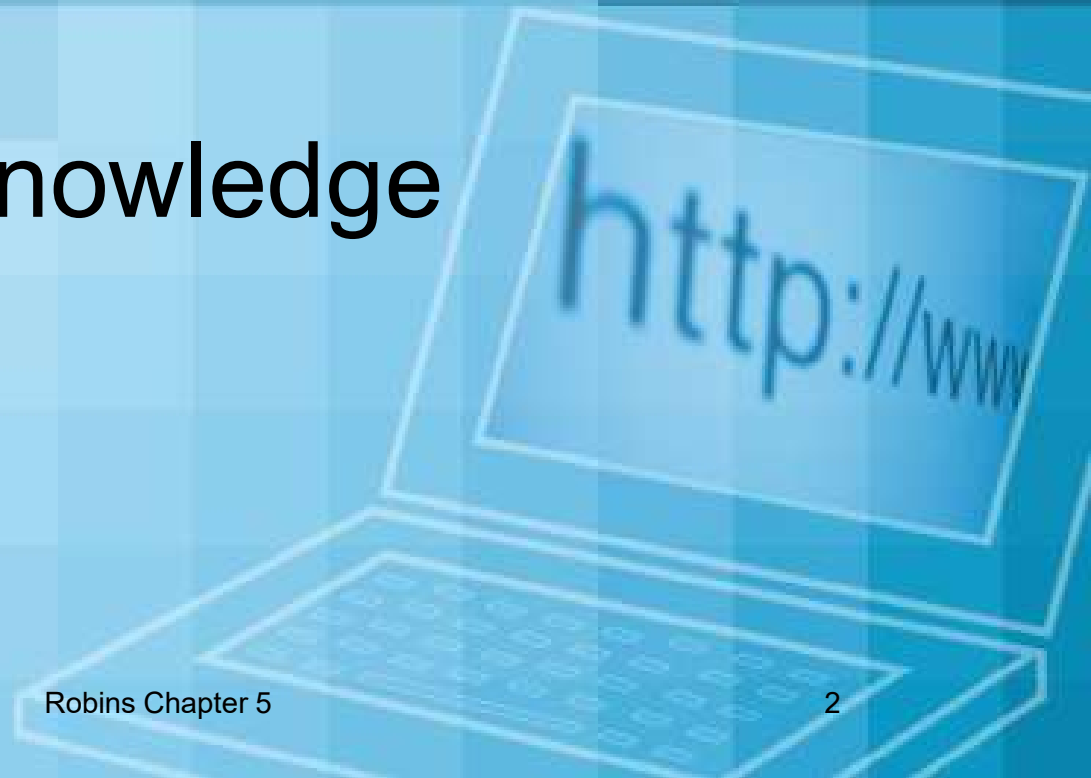

Jim Pham

Alliant International University

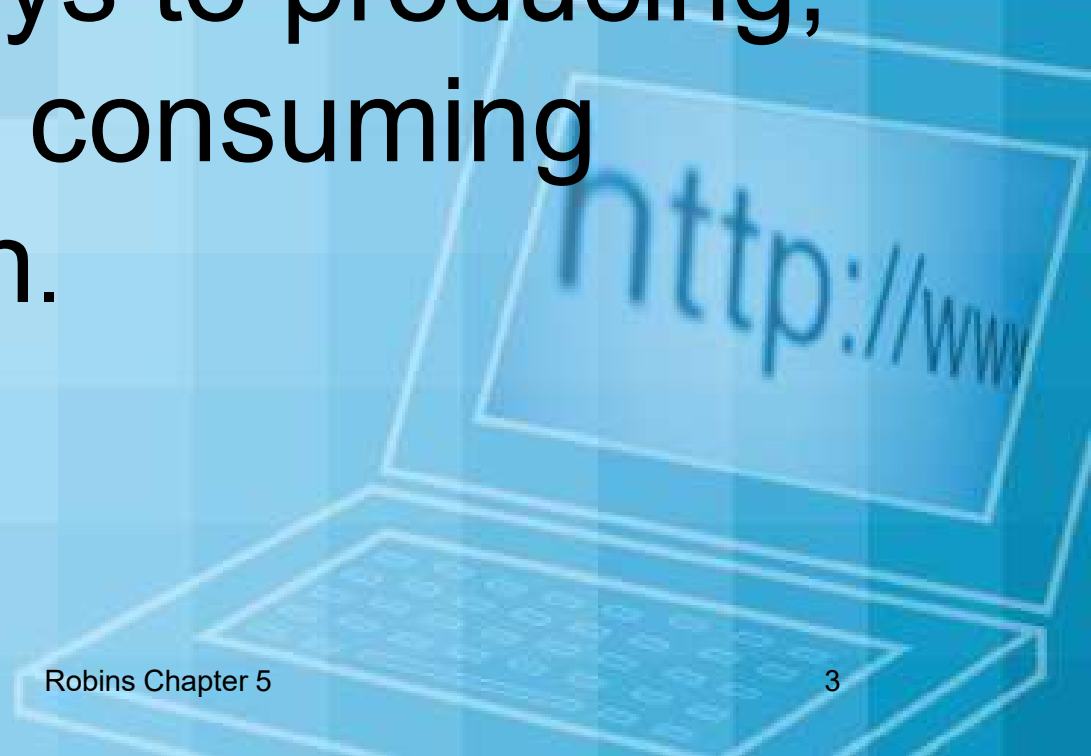

College's and University's Role

- Creation
- Preservation
- Transmission of knowledge

Virtual University

A place-less institution that provides the possibility of new and different ways to producing, distributing, and consuming higher education.

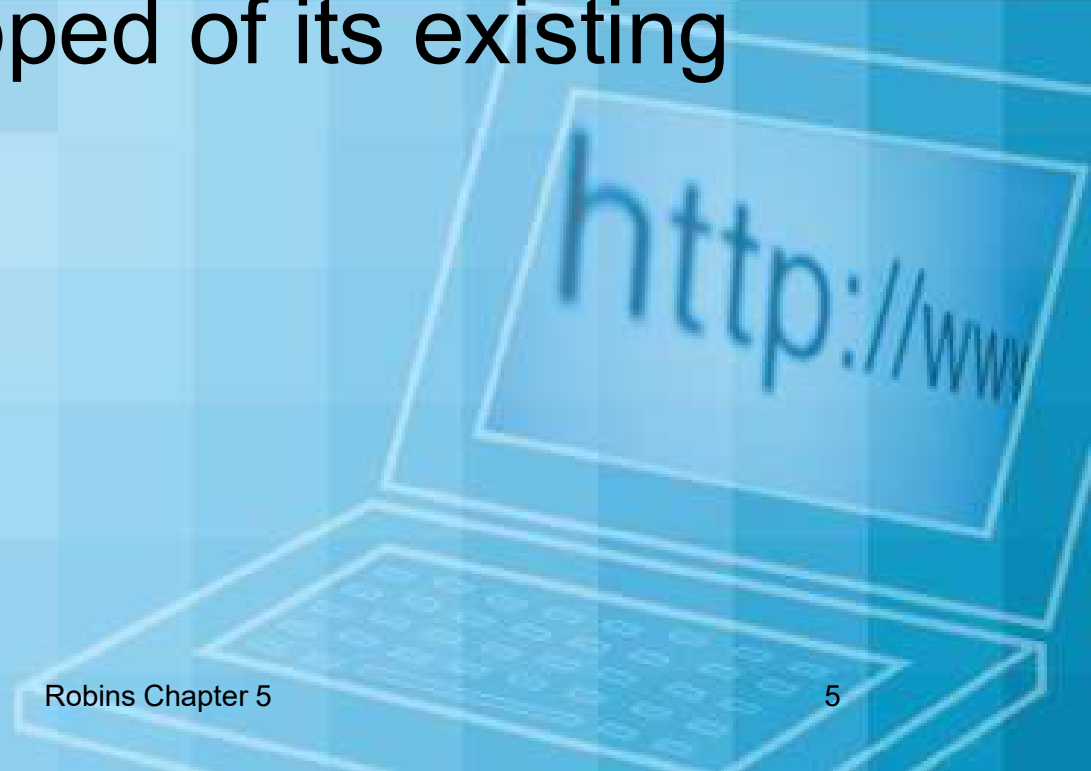

Characteristics of a Virtual University

- Lack of physical co-presence
 - Never meet
 - Never physically visit
 - Never set foot on
- No physical site co-presence

The Virtual University as Mobile Work

- Work to be mobile, work must be transposed into a format that is compatible with the technologies in use.
- Work must be untangled from its local constraints and stripped of its existing linkages.

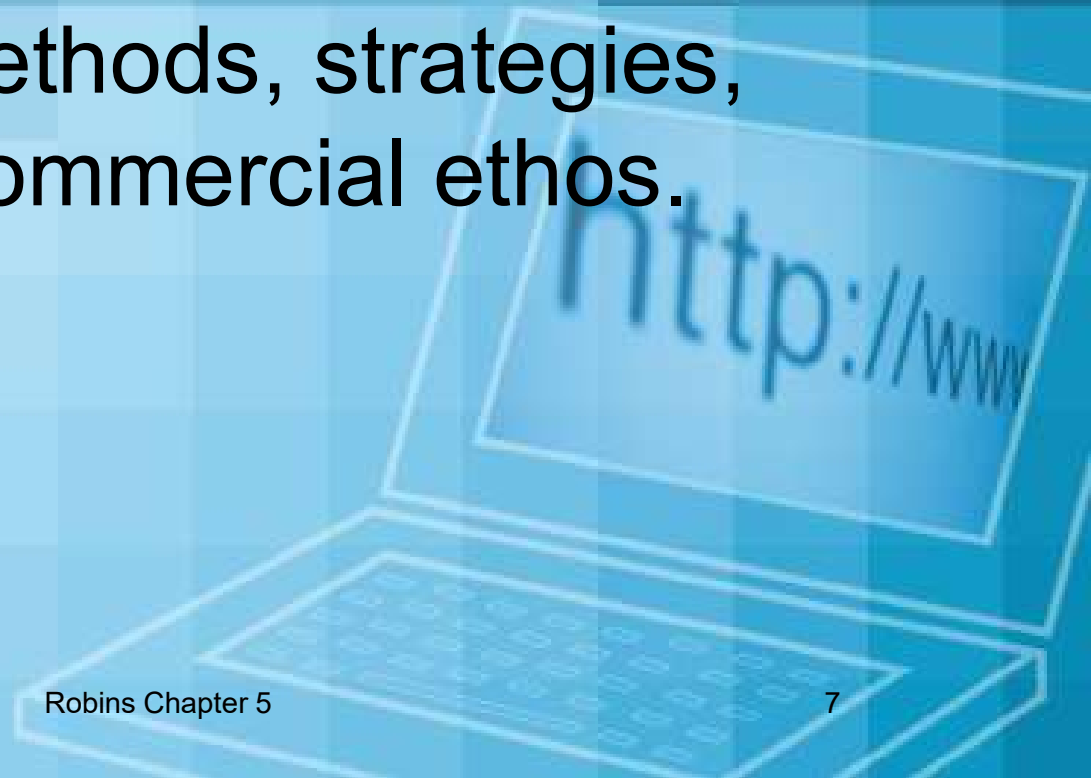

Building the Virtual University

- Translate print-based course to the Internet
- Develop a standalone self-study module
- Package lectures and class materials to deliver on the Web
- Market for web-based distance education courses

Why Virtual University

Pressures by the policy makers--
institutional manager and academic
leaders--to adopt methods, strategies,
technologies, and commercial ethos.

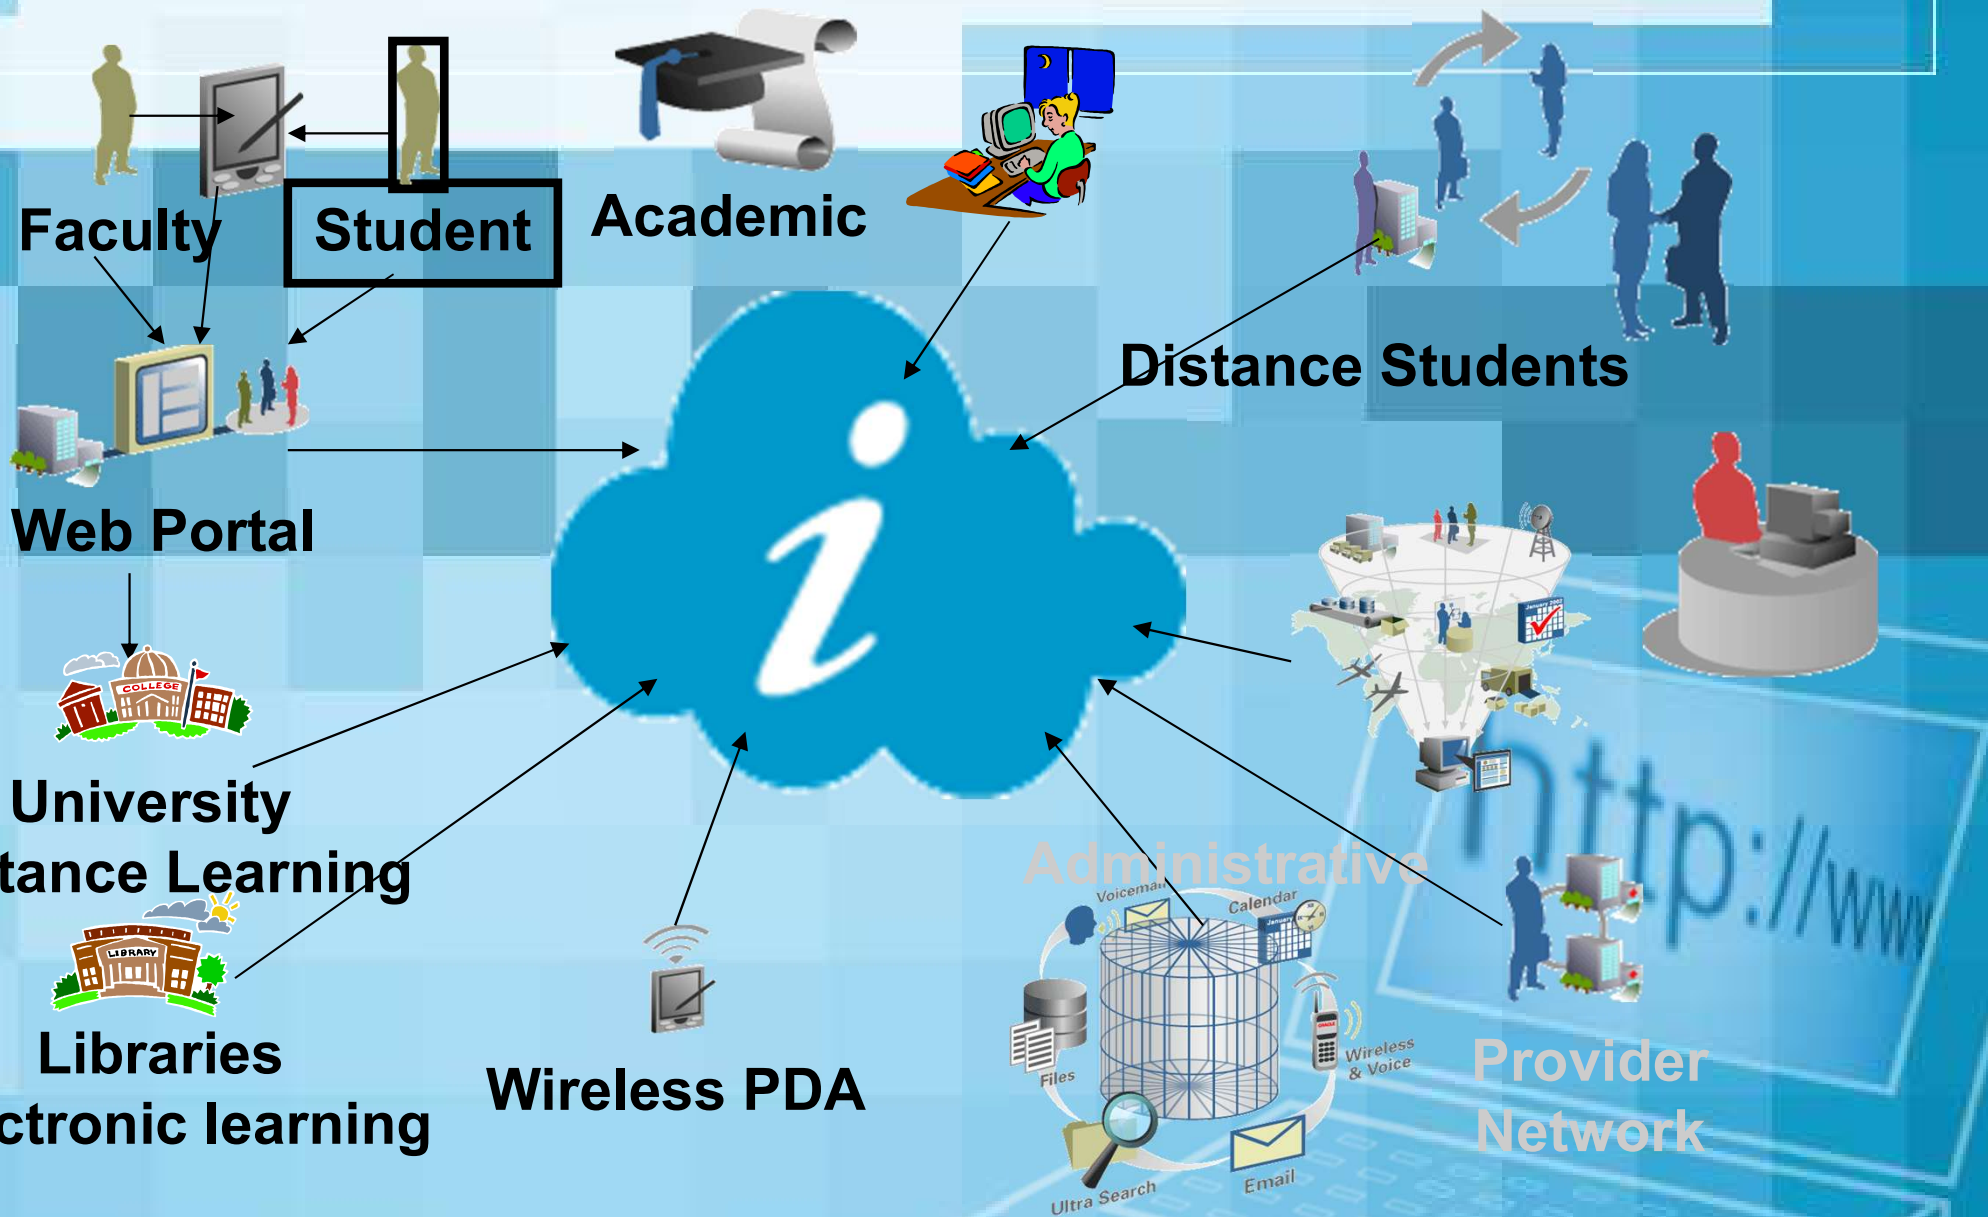

Virtual University Costs

- Administrative systems
- Systems to support teaching and learning
- Library catalogues or specialist research facilities

Is this the Virtual University?

Discussion Question

How are traditional colleges and universities navigating the ever-evolving landscape of information and communication technologies (ICT) and distance learning? What steps are they taking to embrace these powerful tools and adapt to the new educational paradigm?

Discussion Question

Are we reaching the end of campus-based education?
